Shrey Chaudhari
Software Engineer

SUMMARY

Creative, detail-oriented, software engineer with a deep interest in AI. Proven track record of creating and implementing successful front and back-end web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100devs, Los Angeles, CA

October 2021 — July 2023

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications

Recent Projects:

Amazon Clone (HTML, CSS)– I demonstrated my advanced design proficiency in HTML and CSS through a meticulously crafted Amazon clone project. Employing responsive layouts and pixel-perfect styling, I recreated the e-commerce giant's interface, showcasing my keen attention to detail. The project not only replicates the visual appeal of Amazon but also underscores my expertise in creating a seamless and visually captivating user experience.

Simon says (Web App) – Simon Says: Memory Challenge is an engaging and addictive game that puts your memory skills to the test. Inspired by the classic Simon Says game, this digital adaptation adds a modern twist and challenges.

Full Stack Web App (NASA API)

I collaborated with team of developers to use NASA API to receive pictures taken by NASA the date you select. With this coloration I got to experience real life software development scenario and got my hands on API implementation.

Freelance | Toronto, CA

October 2020

Successfully designed and developed a dynamic and visually appealing website for event decorators, showcasing a keen understanding of user experience and incorporating innovative features to enhance online presence and client engagement.

VOLUNTEERING

Open source

Present

Helped lots of open source projects on GITHUB and learn new technologies with new projects.
